

The Following is a Draft – Work in Process. March 9, 2011

# 国際空手大学

*Tradition in the 21<sup>st</sup> Century*

# Mission Statement

The International Karate Daigaku (IKD) will use traditional and modern applied research to offer the highest level of karate to all students. IKD will uphold standards of excellence that inspire our students to improve character development and instil core values of respect, honour and discipline. The IKD will also encourage positive behaviour and empower children and youth to live socially and emotionally healthy lives.

The philosophy of karate will also be merged and aligned with culture and education to reflect the environment within which we live. It will help us understand ourselves and each other. The end result is to have karate at the heart of all communities and promote peace, thereby preserving the well-being of humanity.

## Vision

To be recognized as the leading worldwide Karate organization through research and development, while upholding the highest values and traditions, and empowering all communities within which we live.
